## THE BIG CORNER.

There are two big brick blocks going up on the first corner west of Main and Douglas, which is, in fact, the corner of Douglas and Water streets. One of the blocks is on the south side of the street, and the other at the north side. We heard some intimation that there was talk of making these blocks three stories, if this should be done wouldn't it have the effect of making that corner the most prominent one in town. They would loom up in such a way as to force like buildings on the northern corner. If these blocks should each be made three story the old center would have to look out for its laurels, because undoubtedly taking the bridge, the sun flower depot and other things into consideration that new business corner must become prominent. Go on with your three story blocks.

## MONSTER APPLES.

If our friends don't stop this fruit business they will exhaust our vocabulary.

## BOLD ROBBERY.

A daring robbery was committed at the Wells Bros' restaurant on West Douglas avenue night before last or early yesterday morning. About 3 o'clock in the morning, G. B. Mr. Wells and Davis then went upstairs but could find no one but guests who had registered their names at the hotel. Wells then told Davis to watch that no one left the house, while he went in search of a policeman. He soon returned with Officer Snyder and they proceeded to search the house and the guests, but instead of finding any clue to who the thief could be, they found that G. W. Black, another guest who registered under the name of Schepewick, had been relieved of \$27. It appears that the parties left their room doors open.

## A DARING ROBBERY.

## CALLAWAY'S CORN.

Mr. W. M. Callaway, of Gypsum township, brought in to Jocelyn &amp; Thomas a few sample stalks bearing two ears each. The corn exceeds for size, length and solidity the corn which took the premium at the state fair. It is as big as the wagon load exhibited last year by Dan Jones at the Farmers' Fair. Fifty-two ears weighs a bushel and the average of the ears are from eleven to thirteen inches in length. One stalk of the corn we noticed had two ears one of which measured eleven and the other nine inches in length, and the lowest ear was upwards of seven feet from the ground. Mr. C. says the corn was pulled from a row just as it came and that the whole field will run about the same. The corn is worth seeing.
